1 Introduction

Commlink SIP Dialer is a SIP user agent (softphone) which offers almost all the standard telephony features including call, instant messaging. Combining voice and video calls in a user-friendly interface, CDialer helps greatly transition from a traditional phone environment to the world of Voice over IP. It also supports conference call over SIP. It helps user to talk in lower bandwidth.

This document presents an overview of CDialer installation process.

2 Installation Process

To initiate the installation process double click the CDialer.exe file.

Figure 1: First screen of CDialer setup wizard

Click "Next" to proceed.

Now select installation folder. You can change the default location. To do so, click "Browse" button and select the directory where you want to install CDialer.

😸 CDialer Setup	- • 💌
